FUNCTION

Product mainly used to create space to pass a head or hand.

TECHNICAL CHARACTERISTICS

Frame of PEFC spruce. Water repellent particle panel for a wet room.

QUALITY ASSURANCE

Production quality control is integrated into the manufacturing process of each item. The raw materials and external components undergo the quality control system on arrival of the goods.

INSTALLATION ADVICE

Installation stages:

1. Paint the frame and access panel board.
2. Create the 400 x 400 mm opening, if non-existent.
3. Following the substrate, place the access panel and drill 4 holes to secure it.
4. Secure the access panel with 4 screws.
5. Close the access panel, securing it with the 4 screws provided. Can be used with Semin X1 glue.

PACKAGING

Individual box, installation instructions on the back of the box.
