FUNCTION

Product mainly used to create a passage for a person to access the attic space of a home or other building.

TECHNICAL CHARACTERISTICS

- Panel of water-repellent chipboard.
- Frame of PEFC spruce.
- Upwards opening.

QUALITY ASSURANCE

Production quality control is integrated into the manufacturing process of each item. The raw materials and external components undergo the quality control system on arrival of the goods.

INSTALLATION ADVICE

The water-repellent access panel for ceilings is fitted, most often, using mounting brackets and screws. Sometimes, depending on the location of the panel in the room, cross pieces are necessary.

PACKAGING

Individual box, installation instructions on the back of the box.
