60-minute fire-rated ceiling access hatches are designed to be installed in self-contained fire protection false ceilings. One of the requirements is that the «fire load is only on the room side», and the fire resistance classification is EI 60.

They offer effective protection against fire spreading in the area beneath the false ceiling. The integrated aluminium frame is fitted with a firewall. The inspection hatch cover is fitted with a DF fire-resistant panel and protected against smoke by a multi-purpose peripheral seal. The cover is secured on both sides by automatic safety mounting arms. The safety mounting arms ensure that the hatch cover is engaged each time it is opened. The cover is easy to remove and replace.

APPLICATION SPECIFICATIONS

- Fit to the ceiling (do not walk on it).
- Customised dimensions on request, up to the maximum dimensions allowed by the report.
