SOFTLINE FIRE-RATED ACCESS PANELS

WALL 60 MINUTES
CEILING 30 MINUTES

INSTALLATION DIRECTION

DOOR

- • Access to service ducts
- • White paint finish RAL 9016
- • Non-removable door leaf
- • Built-in on left or right side
- • Door leaf with fire protection
- • Installation in wall partition or ceiling
- • Closes with a square key

INVISIBLE ACCESS PANEL

FIRE-RATED ACCESS PANEL

FIRE REPORT CSTB N° RS19-067

ACOUSTIC PERFORMANCE 38,1 dB*

i ⟷ o
Flammability tested front and rear panels

The SOFTLINE 60-minute fire-rated inspection hatches are specially designed to be integrated into the walls of service ducts with a minimum thickness of 25 mm. They meet the requirements of fire resistance classification EI 60. They protect against fire spreading from a location within the duct.

The metal surface of the powder-coated frame conceals the aperture in the wall, giving a seamless appearance. The square key lock prevents opening by unauthorised persons.

ADVANTAGES

- • A RAL 9016 coating provides anti-corrosion protection and gives a seamless appearance.
- • Simple mounting using swivel wall fixings.
- • Closes with a lockable square key.
- • Acceptable substrates: plaster board or concrete.
- • Installation in wall partition or ceiling.

APPLICATION SPECIFICATIONS

- • For mounting in a wall partition or ceiling.
- • Customised dimensions on request, up to the maximum dimensions allowed by the report.
- • Minimum thickness of the partition: 25 mm.

CERTIFICATION

- • CSTB Fire-report no. RS-19-067.

MOUNTING AND FIXING

Simple installation of the complete access panel using the mounting frame in the wall aperture (about 5-10 mm larger than the installation dimensions). Screws laterally into the wall using flexible swivel fixings.

* Standardised acoustic insulation index. NF EN ISO 10140.
Tested on a 400 x 400 mm access panel

MOUNTING AND FIXING
Clearance dimensions: A3 - 15 mm (from 500 x 500) x B3
Aperture dimension: Installation dimension A1 + 5 mm x B1
